The Missouri Logging Council (MLC) was created *by loggers for loggers*. The purpose of this council is to provide a “strength in numbers” voice to loggers in Missouri. The timber industry plays a major role in Missouri’s economy, and Missouri’s loggers are a critical component in the forest to finished product process. The MLC is intended to create a forum for logger issues and provide an opportunity for its members to use this network of combined knowledge to better themselves and the industry.
