Lt. Governor Mike Kehoe Signs Missouri Food, Beverage, and Forest Products Marketing Executive Order

On June 28, 2019 Lt. Governor Kehoe signed an Executive Order to establish a task force that will investigate Missouri’s opportunity to capitalize on its existing $88 billion annual agriculture economy by promoting new processing and manufacturing opportunities for that industry. Agriculture is Missouri’s leading industry, of which the forest products sector contributes over $10 billion, and Governor Parson wants to expand the economic contribution that it makes to the economy by another $25 billion over the next 10 years. Over 28 million acres of land in Missouri is used to produce agricultural and forest products in Missouri.

In early 2019 many agriculture organizations, both public and private, banded together to fund and participate in a study that investigated the economic feasibility of expanding food and fiber processing and manufacturing in Missouri. The study estimated that a new food and fiber manufacturing initiative could lead to 70,000 new jobs and contribute up to $3 billion annually to the state’s economy. The study identified numerous opportunities for Missouri to expand both forest products and agricultural product processing and manufacturing.

The Executive Order established a task force of 7 voting members and 15 non-voting advisory members that will be responsible for holding meetings and listening sessions to gather information and ideas from agriculture stakeholders across Missouri. The task force is currently in the process of conducting their meetings and a report that compiles their preliminary findings is due to Governor Parson by October 1, 2019 and the order allows for ongoing work and subsequent reports for the next 5 years.

I attended a listening session in Jefferson City that was facilitated by former U.S Congressman Kenny Hulsoff on Friday, September 6, 2019. The session was attended by a representative of about every significant agricultural organization in Missouri and I found the meeting quite productive. We were offered the opportunity to voice our ideas on how our respective industries could potentially expand and what barriers are currently in place to prevent expansion. My comments focused on the lack of forest management in Missouri and the mortality that subsequently results and how our industry could take advantage and process those dying trees while promoting healthy and sustainable forests on public and private land. I’m hopeful that the initial task force report to Governor Parson will include a recommendation to promote active forest management to decrease annual mortality of trees in the forest throughout Missouri. I will keep members posted on the progress of this task force. The entire Executive Order can be seen on Lt. Governor Mike Kehoe’s website www.ltgov.mo.gov.

I am writing this column on 9-11-2019, it’s hard to believe that 18 years have gone by since our country was attacked and 2977 people died and over 6000 were injured. God Bless America!!

MFPA ON LINE TIMBER SALES

Don’t forget about the MFPA on line Timber Sale webpage. Visit the MFPA website at www.moforest.org and click on “On Line Timber Sales” to view or post timber sales.

We know it takes the right tools to run a successful farm. Most of us grew up on farms or in rural communities, and many of us still live there today. These experiences give us a real understanding of agriculture and what it takes to build a farm. Our passion for rural Missouri drives us but our experience and knowledge sets us apart from other lenders.

MDC HONORS RACINE LOGGER WITH STATE FORESTRY AWARD

The Missouri Department of Conservation (MDC) has named Anthony Gruver the Southwest Regional Logger of the Year.

Gruver, the logging manager of D&D Hardwood Products in Racine, grew up in the logging business. He started in the business as a young boy driving the skidder for his father, Darrell Gruver, the long-time owner of D&D. Over the years, the younger Gruver spent thousands of hours in the D&D Hardwoods mill as a sawyer, gaining greater insight into what can be sawed out of each log. Eventually, he became the logging crew manager and, in 2018, he became a Master Logger. Having been around logging and forestry management for decades, Gruver knows the importance of managing a forest for sustainability, landowner expectations and improving wildlife habitat quality.

The Southwest Regional Logger Award is given to the logger who demonstrates the ability to carry out a timber harvest in a manner that causes the least amount of damage to the remaining resources on site. The purpose behind this award is to recognize the abilities of loggers who are practicing low impact logging. These loggers are making extra efforts to show how forest harvests should be carried out. MDC recognizes that a number of loggers in the state are doing an outstanding job in their timber harvesting operations and deserve recognition.

There are multiple criteria for choosing a logger for this award. These include good working relationships with landowners and foresters, minimal damage to remaining trees and resources, preventions of soil erosion, aesthetics of the site after harvesting was completed, safe work performance and use of equipment, utilization of harvested trees, the desire to address wildlife management concerns, and use of proper forest management techniques. The logger must have completed the Professional Timber Harvester’s Training Program sponsored by the Missouri Forest Products Association and MDC.

In recognition of this award, Gruver received safety equipment donated by Crader Distributing of Marble Hill. Crader has been a long-time partner with MDC in recognizing loggers who have demonstrated outstanding performance and good working relationships with landowners and foresters.

- Francis Skalicky
I have spent time in the woods all of my life, mostly from the hardwood lumber/veneer side and recreation. I was not a commercial logger but worked with many over the years, and I have a BS in Forest Products. I knew how to cut a tree down- or so I thought. My first own logging venture, as I turned 53, was on 100 acres of hardwood TSI and uneven aged thinning. First 20 acres went smooth-speedy match cutting, standard notch felling, round and on the ground, no PPE. All those things that bring me chills now. Then came that big, hard leaning post oak.

Standard front notch, double cut from both sides. Come from the back and get close to my notch and switch sides to fall. My perfect plan. Well, as soon as I was about to take the second back cut, I heard the POP. It barber chaired. It happened so quickly, it knocked the saw back out of the cut, out of my hands. I don’t remember how I ended up on the ground to this day. I looked up at the top of the chair which was well over my head and the tree on the ground. My first instinct was to check for blood. I got lucky.

After I got my wits about me, I knew I was in over my head on timber felling and needed help. I packed up my stuff and told my wife I was done until I could find someplace to show me how to cut safely and properly. That’s when I found the PTH training by MFPA. It’s been one of the best things I ever did. Since then, you won’t find me without my PPE cutting timber – ever. You won’t find a barber chair. You won’t find perfection in my woods, but you will find someone that deeply appreciates what PTH taught them. For the 7 years since that big leaning post oak, PTH has saved me at least a limb or two, maybe a life.

Fred Burkardt is a Missouri Master Logger, serves on the Missouri Logging Council, and as a member of the MFPA Safety Committee.

The MFPA Safety Committee meets regularly to look into ways to improve safety practices in the woods. If you have a story about something safety related, or how PPE saved your life or someone you know...let us know at mark@moforest.org.

Also...we are more than halfway through the year...let’s not forget about Continuing Education. The earlier you get it done, the better off you will be.

Thanks, Fred...and for all of you doing the right thing in the woods, and in the mill.
MDC Names Terry Hicks Logging, LLC Of Bethel State Logger Of The Year

Terry Hicks Logging LLC is a family-owned company that consists of Terry Hicks owner/operator and his nephew John Hicks is a crew member. Terry and John both grew up in the logging business. They each started out driving a skidder for the family logging business while they were young and still in school. Terry and John have completed the Missouri Forest Products Association Professional Timber Harvester Training and they are current with all their qualifications. In 2013, Terry Hicks obtained his Missouri Master Logger Certification. Having been around logging and forestry management for decades, Hicks knows the importance of managing a forest for sustainability, landowner expectations and improving wildlife habitat quality.

The Northeast Regional Logger Award is given to a logger or company that has demonstrated the ability to carry out a timber harvest in a manner that causes the least amount of damage to the remaining resources on site. The purpose behind this award is to recognize loggers who practice low impact logging. These loggers take extra time and effort to demonstrate how forest harvests should be carried out. Their work uses forest resources in a sustainable way while preserving those resources for future generations.

There are multiple criteria for choosing a logger for this award. These include good working relationships with landowners and foresters, minimal damage to remaining trees and resources, preventions of soil erosion, aesthetics of the site after harvesting was completed, safe work performance and use of equipment, utilization of harvested trees, the desire to address wildlife management concerns, and use of proper forest management techniques. The logger must have completed the Professional Timber Harvester’s Training Program sponsored by the Missouri Forest Products Association and MDC.

2020 MFPA Winter Meeting & Legislative Breakfast
January 14 & 15

Please join us January 14-15 for our 2020 Annual Winter Meeting at the Capitol Plaza Hotel & Convention Center! Several committees plan to meet on Tuesday including Forest Health, Governmental & Public Affairs, PAC, Education and Technical Services, and MO Logging Council.

Tuesday evening MFPA will host a reception and dinner at Capitol Plaza. Wednesday morning Missouri Forest Products Political Action Committee will host the Annual Legislative Breakfast at the Capital Building. Missouri State Legislators are invited to meet the leadership and members of the Missouri Forest Products Association over breakfast. This is an opportunity for MFPA members to talk with our elected officials and reinforce the importance of the forest products industry to the state of Missouri. Please plan to attend the MFPA Winter Meeting and Legislative Breakfast and help us promote the importance of our legislative agenda for 2020.

WE’VE BEEN PURCHASING MISSOURI CROSSTIES LONGER THAN ANYONE!
